A Barry-Wehmler Packaging Company

Stanford Shrink Sleeve Converting Equipment

AC400 Shrink Sleeve Label Cutter

Features

- Servo-controlled material feed
- Programmable cut-to-length and registration modes
- Conveyor table with continuous or intermittent stacking
- Intuitive touchscreen controls
- Cross- and T-perforation standard (other options available)
- Easy-to-adjust cross-perforation offset
- Magnetic particle brake unwind
- Internet-based remote diagnostic with WiFi capability

Stanford AC400 - Shrink Sleeve Label Cutter

Designed specifically for the cutting/sheeting of shrink sleeve labels...

...the AC400 is designed for high-speed and low-waste finishing of shrink sleeves. With high-speed, precision cutting, the ability to perforate, and robust vibration-free construction, the AC400 embodies the reliability and performance for which Stanford is known.

The servo-driven feed unit can perform programable cut-to-length cuts, or utilize a registration sensor.

Various perforation options are available on the AC400, as well as an optional rewinding unit which allows you to rewind and oscillate rolls after they have been perforated.

Accraply offers a large selection of Doctor Machines®, duplex differential slitter rewinders, and a complete line of shrink sleeve finishing equipment. Accraply also excels in the design and manufacture of customized converting equipment solutions.

Minimum Layflat Width	50 mm [2"]
Maximum Layflat Width	400 mm [15.75"]
Maximum Label Length	400 mm [15.75"]
Maximum Web Speed*	400 cuts per minute at 50 mm (2")
Maximum Unwind Diameter	660 mm [26"]
Standard	Cross Perforation T-Perforation Web Guide
Options	Rewinding Unit Linear Perforation Air Relief Punch

* Max speed is a function of the material characteristics (including COF, coatings, ink adhesion, curing, and drying), gauge bands, tension and web width.
